4. Click Download button at the top-left corner of the page

5. Right-click the downloaded folder and choose "Show in folder"

6. Right-Click the downloaded Zip folder and select "Extract All"

7. On the next screen select "Extract" and go into "Student LanSchool" folder.

8. Right-Click the "install-lanschool" file and choose "Run As Administrator". A black screen with text will appear and when the install is done it should go away.

9. Look for the lanschool icon under your System tray.
